This symposium is sponsored by the Steenbock Endowment to honor Dr. Harry Steenbock (1886-1967), a distinguished Professor of Biochemistry at the University of Wisconsin-Madison. His interests and contributions spanned many areas of nutrition and biochemistry. One of his outstanding achievements was the discovery of the irradiation process for producing vitamin D.

Deadlines approaching

Poster abstract submissions due by April 15th

Registration will close on May 28th

SPEAKERS

Geert-Jan Boons University of Georgia
Rebecca Butcher University of Florida
Chris Chang University of California, Berkeley
Peter Chien University of Massachusetts, Amherst
